Analytical and results-driven aspiring Data Analyst with hands-on skills in SQL, Python, Excel, Power BI and data visualization. Seeking a Data Analyst role to apply analytical and problem-solving skills to transform raw data into actionable insights, support data-driven decision-making, and contribute to business growth.

SKILLS

Databases & Data Warehousing: MYSQL • Google BigQuery

Data Analytics & Visualization: EDA • Data Modeling • Data Visualization • KPI Tracking • Data Storytelling • DAX

Analytical Tools: Excel • Power BI

Languages: Python • SQL

EXPERIENCE

ITOrizon India Pvt Ltd | Associate Business Analyst

Jan 2025 - Mar 2025

- Completed training in Supply Chain Management concepts, workflows and business processes, gaining an understanding of supply chain operations.
- Gained knowledge of Business Requirement Documents (BRDs), including business requirements, functional requirements and process documentation.
- Participated in KT sessions on SCM and Manhattan services, gaining exposure to Manhattan-based supply chain solutions and operational workflows.

PROJECTS

Adventure-Works Dashboard | Power BI • Dashboard Building & Storytelling [[GitHub link](#)]

August 2026

- Built a Power BI Dashboard to track KPIs (sales, revenue, profit, returns), compare regional performance, analyze product-level trends and identify high-value customers.
- Connected and transformed raw data using Power Query Editor. Built a relational data model. Created calculated columns and measures with Advanced DAX. Designed an interactive dashboard to visualize the data.

Bank Loan Management System | SQL • Big Query • Data Analysis [[GitHub link](#)]

August 2026

- Designed and built an 8-table relational banking database in Google BigQuery, ensuring referential integrity and data consistency across customers, accounts, loans and transactions.
- Conducted in-depth data analysis to identify loan default trends, dormant accounts and over-leveraged customers using CTEs, aggregate functions and window functions.

Intelligent Traffic System | Python • Deep Learning • Spyder

June 2024

- Proposed a smart traffic management system employing YOLO and Alex net to accurately detect and track moving objects, analyze traffic flow and recognize traffic signs.
- Implemented a video-based traffic estimation system where signal timings are updated based on vehicle counting.
- Developed a user-friendly interface for real-time traffic monitoring, allowing easy visualization and management of traffic data.
